

Carbon footprint of Helkama Bica Oy in 2021

- According to the calculation, the carbon footprint of Helkama Bica Oy was **19 888 tCO₂e** in 2021
 - Scope 1: 493 tCO₂e
 - Scope 2: 0 tCO₂e
 - Scope 2 emissions are 0 since Helkama Bica purchased green electricity in 2021.
 - Scope 3: 19 395 tCO₂e
- The largest emission sources were:
 - Manufacture of materials used for production 18 568 tCO₂e (93 %)
 - Transport of materials 252 tCO₂e (3 %)
 - Own energy production, 445 tCO₂e (2,2%)
- It is possible to reduce emissions by phasing out oil use (in scope 1) and by selecting low-carbon alternative materials when available (scope 3).
